Heat Your Home the RoToR Way

The Biggest Improvement in
Scientific Heating in 50 Years

The RoToR Combustion Plate is a new invention that takes the place of Coal and Wood Grates and enables you to burn the smallest size or lowest priced coal for your home, and at the same time gives maximum heating efficiency.

Here's what RoToR Heating will do for you:

It will extract 17 per cent more heat from any kind of coal than is possible with ordinary grates.

It will burn Barley, Buckwheat, Pea and all other small size, cheap coals and coke, absolutely without waste—as well as large sizes of coal and wood fuels.

It will do this without necessity for repairs, servicing or adjustment. Rotor withstands heating tests which completely destroy the best grates. It cannot warp, burn out or get out of order.

It does away with ash sifting; the fuel burns to a fine powder ash, meaning an additional saving of 10 to 30 per cent on coal which is ordinarily wasted through grates.

EVERYTHING IN HARDWARE

FARMERS WANT ALBERTA LIVESTOCK

Many farmers want feeding and breeding cattle. Livestock is one of the best means by which grain can be marketed. Help to preserve this market by keeping unfinished cattle and breeding stock on Alberta farms.

WHAT HAVE YOU FOR SALE!

If you have cattle for sale, send a list giving full particulars of number, breed, age, condition, etc., to—

**Livestock Branch—Alberta Department of Agriculture
PARLIAMENT BUILDINGS, EDMONTON**

DO YOU WISH TO BUY!

Those wishing to buy cattle should write to the above Branch, giving full particulars of their requirements.

Hon. George Hadley,
Minister of Agriculture.

H. A. Craig,
Dep. Minister of Agriculture.

ABSOLUTE CONFIDENCE

When you deliver your grain to the U.G.G. Elevator you have absolute confidence in the service and treatment you will receive, and in the ability of the company to give the fullest possible protection to your interests.

Alex. Wright and Victor Thygesen are attending the school of technology and art in Calgary.

Mr. Frank Grant of Munson was a week-end visitor at the home of Mrs. J. Love.

Mr. and Mrs. C. V. Johnson and daughter Elvora of Hanna and Mrs. W. Morrell and son Frank were week-end visitors in Oyen.

Mr. and Mrs. F. Haddatz motored to Hanna last Saturday and spent the week-end with their daughter Miss Etta Hatch.

Miss Anna Mitchell, whose school at Naco is closed, is staying with Mrs. M. G. Whitlock.

While driving from Hanna to Sibbald last week, Mrs. Perry ran off the grade at the foot of the hill near Arncliffe and the car was destroyed by fire. Mrs. Perry who was later picked up by a car and taken to Sibbald, reported that her purse, fur coat and a mangle machine were burned up in the car.

LOST

LOST—On or about September 1st 1930, Certificate No. 442 for 100 shares of Pogo Oil Stock in the name of Biddle Elnid. Unless this Certificate is returned to the office of the Pogo Oil Company Limited at Oyen, Alberta, on or before November 15th, it will be cancelled and a new one issued in its place.
Pogo Oil Company Limited
Robert Campbell, Secretary.

R-101 Crashes on Maiden Flight from England to India. 48 Perish

Largest dirigible in the world crashes seven hours after leaving Cardington, Eng., en route on its 8,000 mile journey to India. The crash, which occurred near Beauvais, France, was immediately followed by a terrific explosion and fire.

Lord Thomson, minister of air in the McDonald government, Sir Sefton Brancker and many other noted air experts perish in flames.

Seven hours out of Cardington, en route to India, the giant British dirigible, crashed in a wooded hillside near Beauvais, France shortly after 2 a.m. Sunday morning. Losing altitude in a terrific wind and rainstorm the R 101 buried her nose in the hillside; the crash being followed immediately by a tremendous explosion and flames enveloped the airship, completely destroying it and taking a toll of 48 lives. Among the known survivors are: Engineers A. V. Bell, J. H. Binks, A. J. Cook and V. Savory; Engineer R. J. Leach, pilot of the ship at the time of the accident; Biggs S. Church and Wireless Operator A. Dibley. First word of the catastrophe to reach England was by a phone message from the wireless operator, sent in before he went to hospital.

M. D. Golden Centre

The 6th meeting of Council of the M. D. of Golden Centre No. 272 was held at N.E. 12-30-5, West of 4th, on Saturday, October 4, 1930.

Members all present.

The financial statement to date was read and accepted.

The following accounts were paid: Alberta Government Telephones, tolls, 12.00; C. N. Railways, freight on two engines, 11.25; Saskatchewan Fire Engine Co., two fire engines, 250.00; B. F. Mitchell, surveys, 75.00; Bordeline Budget, forms, 10.20; C. Caldwell, blacksmith account, 6.00; D. McKay, blacksmithing, 11.25; Robinson Bros., blacksmith account, 10.00; James Lees, blacksmith account, 13.50; M. Kerr, 11.00 and M. Fletcher, 2.00, blacksmith accounts; Empire Lumber Co., culvert, ward No. 3, 3.75; H. Coates, share of Rail Insurance award, 940.50; Central Alberta Sanatorium, 90.00; Western Municipal News, forms, 10.40; G. A. Walldorf, deficit at loss, 5.55; C. N. Railways, freight on engine wheels and chloride, 6.40; G. L. McLaughlin, stamps, 15.00; Ralph Greene salary, culvert, ward No. 5, 20.10; 20470, office expense, 20.00; Bailiff fees, 138.65; Alberta Gazette, sale notes, 1.10; J. L. Acheson, hardware, 2.35; Mrs. O. Michaels, rent, 6.00; Empire Lumber Co., Naco sidewalks, 3.55; culvert, ward No. 5, 20.10; Consort Hospital, fees of M. Fletcher, 57.50; City of Saskatoon, fees of Wm. Patrick, 620.75; H. Coates was empowered to remove house on S.W. 10-20-5-4 and repair barn on section 23 30-4, West of 4th.

It was decided to offer house on the S.E. 20-5-4, for sale at \$150.00.

Philadelphia Wins

World Series finished today when Mackeen defeated St. Louis Cards 7-1.

The heavy artillery of the Philadelphia Athletics carried their team to victory at Shibe today when they made seven hits including two home runs and five doubles count for seven runs, while Barnshaw, pitching his third game in the series, held St. Louis Cardinals to five hits which only accounted for one run made in the closing frame.

The following is a brief summary of the first five games:

First Game at Philadelphia
St. Louis 002 000 000—2 0 0
Philadelphia 010 101 115—5 0 0
Batteries: Grimes, Mancuso, Grove, Cochrane.

Features of the game: Home run by Simmons in fourth, none on. Home run by Cochrane in eighth, none on. Philadelphia with 5 hits, two homers, two triples and a double, scored five runs. St. Louis with nine hits only managed two runs.

Second Game at Philadelphia
St. Louis 010 000 000—1 6 2
Philadelphia 202 240 008—4 7 2
Batteries: Rhem, Lindley, Johnson, Mancuso; Barnshaw, Cochrane.

Features of the game: Home run by Cochrane in first after two were out. Home run by Simmons in second, none on. Philadelphia again made the most of their hits scoring Gruns on 7 hits, which included one homer, three doubles and three singles. St. Louis' six hits, which included a homer, a double and four singles only produced the one run.

Third Game at St. Louis
Philadelphia 000 000 000—0 7 0
St. Louis 000 110 215—5 10 0
Batteries: Halahan, Wilson, Walberg, Shores, Grims, Cochrane.

St. Louis staged a great come back and ropped three Athletic pitchers for 10 hits and 5 runs, while the youthful Halahan held the Phil's heavy artillery in submission.

Fourth Game at St. Louis
Philadelphia 100 000 000—1 4 1
St. Louis 001 200 008—3 5 1
Batteries: Grove, Cochrane, Halahan, Wilson.

Joe Halahan got a wobbly start allowing three hits in the first which went for one run, only permitted the Mackeen one more hit and no further scoring. In the third Gehlert the St. Louis short stop banged out a three banger and was

What Is Right With Canada?

A moderate optimist, we are told, is one who sees both the good and the bad, the pleasing and the displeasing, the bright and the dark, the encouraging and the discouraging, but prefers to think and talk about the brighter and better things.

At the present time we have more than a sufficiency of pessimists, crape-hangers, disseminators of blue ruin gossip. We also have a few incorrigible optimists who shut their eyes and ears to the actual facts of any situation and cry "All is well."

What Canada and the world needs today are more moderate optimists, men and women who, looking at both sides of the picture, refuse to be depressed by the darker colors and shadows and find encouragement and great promise in the brighter colors and the rays of sunshine-breaking through the clouds.

Major Yeats-Brown, an Englishman, is the type of moderate optimist whose number should be multiplied. As an effort to the many things that have been said in answer to the query: "What is Right with England?" he advances the question: "What is Right with Canada?" and proceeds to answer his own question most entertainingly in the London Spectator.

Would it not be advisable for us in this country to also reverse the usual question we hear so often asked these days, and, rather, make answer to the query: "What is Right with Canada?" We may well do so, because there are so many things that are right with this Dominion, so many more right things than there are wrong things, that we are doubly foolish to ignore them and dwell upon the smaller ills.

Looking around our country, we can discover a multitude of good things, the very best things. We find, for example, one of the most healthy, robust people in the world, possessing an abounding vitality and charged with initiative and energy. And of all the blessings which can be bestowed upon a nation or individual, who by peace-loving people or group of blessings, surpasses that of health? Possessing health all things are possible; lacking it, all the wealth of the world is valueless to bring joy and happiness into one's life.

Looking at other countries, we find many of them filled with hatreds, with strife uppermost in the minds of the people, their thoughts and energies devoted to preparation for possible warfare. In Canada, on the other hand, we have a land occupied by a peace-loving people with a positive and growing hatred of war, making no preparations for war, but devoting their thoughts and energies to the arts and advancements of peace. No other country in the world is so "right" on the subject of peace and disarmament as is Canada.

Grouped with health and a sane viewpoint of man's relations to man we can place the moral and intellectual outlook of a nation. Looking over our broad Dominion we find a deep-rooted moral fibre, strong and sturdier than in most lands, with an abiding respect for law and order which no other country can excel, and which far surpasses that entertained by the people of any other country in either North or South America. We find Canada a land of schools and universities, a land in the very front rank of all movements for social betterment, a land the very foundations of which are sound, strong and stable.

Generally speaking, too, Canadian institutions of all kinds, whatever their faults are strong and sound, constituting a bulwark in defence of the people. A bank failure in Canada is a rare thing; our railways are progressive and efficient, fitting their programmes well into the life and needs of the Dominion. We are not—and never can be—immune from the vicissitudes and effects of world conditions and happenings, but, even so, we are not, in our institutions and resources, and in suffering from less unemployment, proportionate to its population, than the United States.

Let us, therefore, dwell a little more on "What is Right?" and the effect of doing so will unquestionably be to lessen interest in the more depressing question "What is Wrong?" Isn't the search for right things most likely to expand and thus diminish keenness in the search for wrong things? And isn't it just possible that the volume of right things will grow and be properly recognized until presently the wrong things are forgotten, or at least their proper relative place in the general scheme? Let us join the quest of the moderate optimist.

Western Orchards

G. F. Chipman, editor of the Country Guide, predicts that the near future will see orchards of standard eating apples in all parts of the Prairies where wheat is now grown successfully.

Darrell: "Gee, I'm in an awful hole."
Bill: "What's the matter?"
Darrell: "I spelled 'professor' with two 'f's and don't know which one to cross out."

An investigation of the average life-span of household furnishings shows that a rug lasts an average of 10 years, a chair usually survives 12 years, and a dining room table 15.

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antidote for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to get the excess acid. The stomach becomes

Ontario Gold Production

Gold production in the province of Ontario for the first eight months of this year is valued at \$23,267,735, an increase of \$1,260,000 in value compared with corresponding period in 1929.

Lawyer: "I must know the whole truth before I can successfully defend you. Have you told me every thing?"
Prisoner: "Except where I hid the money. I want that for myself."

Bookseller: "Do you want a book of books, or a serious work?"
Man: "I really don't care. But it must be bound in art-green, so that it will match the wallpaper."

sweet, the pain departs. You are an alkali, effective, yet harmless. It has been the standard antidote for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to get the excess acid. The stomach becomes

IRISH POET IN NEW YORK

George Russell, Irish poet, essayist and economist, has arrived in New York with what he believes is a system of agricultural co-operation that will bring economic relief to the farmer. The distinguished visitor, who is well known under the pen name of "AE," plans to visit every state in the union during his six months' visit.

To Study Canadian Methods

Seed Potatoes From Maritime Provinces Will Hit With American Growers

The humble spud, which is produced in such quantities in the maritime provinces, has become almost a trade mark of Canada in some American markets, and it rose to real eminence during a visit of 160 members of the Pennsylvania Potato Growers' Association to New Brunswick and Prince Edward Island. These two areas produce the finest seed potatoes on the continent, and the purpose of the visit by the delegation was to study the method under which the superior spuds are raised. The principal departments of agriculture fed the visitors and showed them all that was to be seen.

CONSTIPATED CHILDREN

Constipation is one of the most common ailments of childhood and the child suffering from it positively cannot thrive. To keep the little one well the bowels must be kept regular and the stomach healthy. Do this nothing can equal Baby's Own Tablets, which are mild and thorough laxative, are pleasant to take and can be given to the newborn babe with perfect safety. Thousands of mothers use no other medicine for their little ones but Baby's Own Tablets. They are sold by medicine dealers or by mail from The Dr. Williams' Medicine Co., Brockville, Ont.

A Refreshing Treat

Church Supper Gives People Opportunity For Sociability

The season for the church supper and the festival is here. These delightful events crowd the late summer and early autumn evenings. In this day and generation of so-called high-speed existence when we are not to depend so largely on manufactured enjoyment it is indeed a refreshing treat to attend the rural church suppers or festival. At these events it is to be found wholesome and a plenty of food and association for greater value than the price paid for the ticket. These affairs are conducted for profit of course, but it is broader profit than monetary gain alone.

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be if the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system, and afterwards the child's rest will be undisturbed. The powders cannot injure the most delicate baby, and there is nothing so effective for restoring the health of a worm-worm.

Only a Memory

American Farmer Sees His Holdings Beside Under Suvetic Administrations

Senator Thaddeus E. Caraway, of Arkansas, in a speech before the state Democratic convention described himself as an "ex-farmer."
"When Woodrow Wilson was president, I owned a farm," he said. "After Harding was in office, I had only an equity. Then came Coolidge and that was left of my farm was an echo. Now that we have an era of Hoover presidency, my farm holdings consist of a memory."

Temperature tests made in the region of a forest show "that the draft and heat from the sun have caused a difference of ten degrees in temperature at some distance ahead of the advancing fire."

Minard's Liniment also lured feet.

Impatient For Disarmament

League Of Nations Is Called Upon To Take Quick Action

A vehement and sometimes impatient demonstration, urging the hastening of the League of Nations' disarmament programme and early calling of a general conference for reduction and limitation of armaments, was witnessed in the League assembly's disarmament committee at Geneva recently.

From this rally there arose a promise of J. J. Landon, chairman of the preparatory disarmament committee, that the commission would meet November 3 and fervently seek to finish its task of clearing the way completely for a congress of all nations to construct a scheme of general disarmament. Voices from countries that were neutral in the war joined those from states which were disarmed by the war in the demand that the League should get actively going with its long delayed purpose of inducing nations to lay aside their fighting.

German Property Sequestered

Conversations Between Officials Of Canadian and German Governments To Be Held

German property seized in Canada during the war should get actively going with its long delayed purpose of inducing nations to lay aside their fighting.

Of the large amount of property of German nationals sequestered by the Canadian government during the war, some \$500,000 remains unliquidated. In January, Canada agreed that the unliquidated property consists of claims of land and securities that it has been found difficult to market. This will still remain in the hands of the Dominion government more than enough to settle all claims by Canadian civilians for reparations as a result of enemy action in war-time.

Fire Kept Burning

Century and Half North Carolina Family Has Not Let It Go Out

Along about the time the Declaration of Independence was being signed a stalwart ancestor of the family to the mountains of Saluda, N.C., to build a cabin for his family. A fire kindled on the newly-finished hearth has never gone out.

William Morris, who doesn't know how old he is, lives alone in the walled hut, but, as an old grandfather started more than 150 years ago. He is the last man of his family.

An Oil Without Alcohol—Some oils and many medicines have alcohol as a prominent ingredient. A judicious mingling of six essential oil compounds Dr. Thomas' Electric Oil, and there is no alcohol in it, so that its effects are lasting.

An Artist Without Arms

Henry Wiegman, a student artist of Cicero, a suburb of Chicago, was born without arms. But he is one of the promising students of an art school here. Wiegman holds the brush between his teeth and manipulates it with his tongue. He intends to make his living by commercial illustration, or in his own gift shop. His ambition to paint dates from the time he learned to write by the same method. He is twenty-three now.

Athletes recommend Minard's Liniment.

Conjuring Creek

Conjuring Creek, the curious name of a northern Saskatchewan river, was first suggested by that of Wined Lake from which it flows. The Cree name is "Pawgonow."

English Being Taught In German Schools

Classes Are Popular and Students Show Great Interest about America

Every boy and girl in Germany is being taught English, according to Prof. Max Zimpke, author of English and German textbooks, who was in New York recently.

"Our students are tremendously interested in anything about America," he explained. "Every language teacher reports that the classes teaching English are very popular. We teach the same pronunciation heard in the South of England."

The school system in Germany is quite different to the United States, the visiting professor says. Over there the aim is to have an aristocracy of learning. They do not desire to have every boy and girl graduate, but rather to make the work so difficult that only the brightest pupils can finish their high school course. Children who are backward in school are given a sound elementary training and then given a ment apprenticeship to a good trade for four years.

Socialist—After all, what is the difference between the rich man and the poor man?

SAYS CANADA'S NOW EMERGING FROM DEPRESSION

Winnipeg, Man.—Veering toward thrift, viewing her future with serene confidence, Canada already moving out of a depression period, was advised to pay even more attention to business by General Sir Arthur Currie, president of McGill University, and wartime commander of the Canadian expeditionary force overseas. In an address to members of the Winnipeg young men's board of trade, he pronounced himself more proud and more confident of Canada than ever before, after a searching inspection of the west, and he thought the Dominion was on the way to cutting extravagance.

"I know there is too much luxury, too much extravagance," asserted Sir Arthur, "but hard times are curing that, and so out of an evil, a blessing flows. I know we are not thrifty enough, but I believe we are becoming more serious."

Passing, as she is, through a "somewhat uncertain, somewhat anxious time," the Dominion is without any sign of wailing, Sir Arthur declared. "We no longer hear whispers of death, no longer hear of the secession of the Maritime provinces, no longer hear that the Prairie provinces will pass into the hands of the United States, no longer hear that we are passing rapidly to our doom."

He added: "I am glad that this is so. I can't bear to hear so many announcements or denunciations that we are an enervated or a played-out race."

Sir Arthur spoke enthusiastically of the Peace River country. "The great kingdom of the Peace," he termed the extensive Alberta agricultural area.

For the Blind

Free Radio Licenses Issued By Government To Blind Radio Owners

Ottawa, Ont.—Radio licenses issued free by the Canadian government for blind radio owners totaled 624 for the period of the fiscal year 1929-31 to date, compared with 589 for the entire fiscal year 1929-30, according to official figures, issued recently. The total number of radio licenses issued for the first five months of the current fiscal year was 248,676, which also indicates a steady increase in the number of radios operated in the Dominion.

Find White Seals

American Expedition Discovers Specimens Off Mexican Coast

San Diego, Cal.—The existence of white seals, heretofore regarded as mythical, was reported here by the San Diego Zoological Society's expedition after its return from Guadalupe Island, off the Mexican Coast. Members of the party reported that white seals have been seen on the inaccessible rocks of an outer islet, where landing was impossible. They were unable to obtain a specimen.

Vancouver Wheat Exports

Shipments To Date Double The Amount Of Record Year

Vancouver, B.C.—Wheat exported from Vancouver during the current crop year to date totalled 8,253,778 bushels, double the amount shipped out during the same period of the record crop year of 1928-29 through Vancouver, when total shipments reached 10,000,000 bushels. Last year at this time only 2,679,378 bushels had been shipped.

Cattle Exports To Britain

Montreal, Que.—Canada's cattle export trade to Great Britain amounted to 1,680 head through the port of Montreal to date this year, with the recent shipment of 377 head which was the sixth shipment to Great Britain last year.

Japan Taking Census

Tokyo, Japan.—Japan is taking stock of her manpower. A quarter million census takers have begun collecting data in the empire's second decennial census. Preliminary estimates stated the census would show the population of the whole empire at about 80,000,000.

R-101 Makes Trial Trip

Cardington, Eng.—The record-setting dirigible R-101, which is the largest airship in the world since it recently was lengthened, has made a short trial trip preparatory to a voyage to India.

W. N. U. 1558

Stresses Empire's Greatness

Hon. R. B. Bennett Addresses British Gathering In London

London, England.—With a brilliant gathering in attendance the delegates to the Imperial Conference were entertained at the Guildhall by the Royal Empire Society and other Imperial bodies.

The great diversity of the peoples of our Empire, their talents and their resources, lies the real secret of the Empire's greatness," declared Hon. R. B. Bennett, prime minister of the Dominion, in his address.

The speech of the Canadian prime minister was greeted several times by cheers.

"Before us," said Mr. Bennett, "lies the task of Empire consolidation and with that task we meet in the heart of this great city, where trade, commerce, finance, and other great affairs engage the attention, to think of our Empire as an economic unit."

Mr. Bennett was cheered when he declared the nations of the Empire were not yet bankrupt in statesmanship. Men and women occupying a quarter of the land surface of the globe, comprising a quarter of its population, were still capable, by guidance and leadership, of achieving in the future what they had not already achieved, namely, the economic solidarity of the Empire which was as capable of achievement as the political and constitutional liberties had been.

H.R.H. Prince Arthur of Connaught, former governor-general of South Africa, presided at the banquet.

Canada's Fire Loss Heavy

Total Of \$47,000,000 Shown In Report For Last Year

Ottawa, Ont.—The fact that Canada's fire loss last year—\$47,000,000—represented almost two and one-half times the amount the Dominion Government set aside to relieve unemployment, was called up by Premier John Bracken of Manitoba, in his address to delegates to the Dominion Fire Prevention Association convention held for greater effect.

Prime Minister R. B. Bennett was named honorary member. W. H. Shepley, Toronto, is the new president.

Among the many resolutions given approval was one recommending that involved financial assistance from federal, provincial or municipal authorities be compelled to provide adequate fire safeguards.

Hope Is Fulfilled

First C.P.R. Train Reaches Historic Town Of Battledore

Battledore, Sask.—Another page in the history of Battledore was written when the first Canadian Pacific railway train pulled into the depot at 12:30 on the afternoon of Sept. 30. To the citizens who crowded the station platform, it was a fulfillment of a long cherished hope, which had its birth in 1875, when the first prospectors came to the area to carry their ore to Winnipeg, Fort Livingstone, Battledore, through the Yellow Head Pass to New Westminster.

In 1881 it was decided that the route should be diverted to serve the southern part of the province, and for nearly half a century citizens of this historic town have labored for the achievement marked recently.

Have Extensive Program

Railways To Proceed With Construction And Improvement Work

Ottawa, Ont.—Official announcement has been made by Senator Robertson, Minister of Labor, that the Canadian National and Canadian Pacific railways would proceed immediately with a \$21,000,000 construction and improvement work. Employment for 10,000 men would thereby be provided for a year, and 2,000 teams of horses would be given work for a considerable part of the time, especially for grading purposes. The employment of teams will help the farmers in many districts.

To Teach Natives

Leningrad, Russia.—Geologists, pedagogues and other scientists have gone to northeastern Siberia where 5,000 nomads live in one of the remotest corners of the world. They expect to teach the natives how to live better, to start reindeer farms, to start tanneries, meat canneries and a plant to make iodine from seaweed.

Order-In-Council Grants Loan

Winnipeg, Man.—Order-in-council granting a loan of \$50,000 to the Manitoba Cattle Loan Association was passed by Manitoba's cabinet council. The association secured the loan at five per cent, and will charge its members seven per cent, for advances secured by lien notes on cattle purchased.

GOV'T PROGRAM ENLARGED FOR RELIEF PURPOSES

Ottawa, Ont.—Details of the Federal Government's scheme to relieve unemployment in the provinces were outlined recently by Senator Gideon Robertson, Minister of Labor. Between \$50,000,000 and \$100,000,000 will be "put to work" to better distress conditions and provide work for Canadians, he said. This included the \$20,000,000 supplied by parliament at the last session, the remainder being contributions from the provinces and the municipalities, and the \$21,000,000 program of construction and improvement work to be undertaken by the Canadian National and the Canadian Pacific railways.

The Federal Government's scheme was not limited to setting aside money for construction in statesmanship. Men and women occupying a quarter of the land surface of the globe, comprising a quarter of its population, were still capable, by guidance and leadership, of achieving in the future what they had not already achieved, namely, the economic solidarity of the Empire which was as capable of achievement as the political and constitutional liberties had been.

H.R.H. Prince Arthur of Connaught, former governor-general of South Africa, presided at the banquet.

There will be other allies to the government in this program, Senator Robertson emphasized. Taxation changes made at the last session would afford immense stimulus to Canadian industry, he believed, and would result in the creation of more jobs. Restrictions had been placed on immigration for the benefit of Canadian labor. It was the minister's belief that the expenditure of from \$50,000 to \$100,000,000 throughout Canada in relief work by one kind or another, would reach every type of laborer, clerk or artisan.

The program of construction and improvements to be undertaken by the two large railroad companies, which has been formally approved by the cabinet, would result in the employment of 10,000 men for a year, Senator Robertson said. In addition, 2,000 teams of horses would be needed for grading purposes, and this would be of benefit to great numbers of farmers. The whole program, he stated, called for the expenditure of \$21,000,000 with work to start immediately. Orders would be placed at once for rails, Nova Scotia coal and other necessary supplies. Because these orders were not usually given at this time of the year, it would be necessary for the railroads to raise the money, Senator Robertson explained. Because of this, the government had decided to set aside \$1,500,000 out of the \$20,000,000 provided to guarantee interest and carrying charges to the railroads.

Found Water Too Cold

Dover, England.—Miss Mercedes Gietz, British woman swimmer, failed in a new attempt to swim the English Channel, which she had been staying in only about four hours, abandoned her effort because of the intense cold.

ROBERT BUCH, TO ATTEMPT TO LOWER RECORD

Eleven Burned In Explosion

Vesley, Guanajuato, Mexico.—Eleven persons were badly burned as a 3,000 skyrocket exploded in San Miguel cathedral during the celebration of the San Miguel Saint's Day. The explosion, which had been in the church for the celebration, were ignited by a skyrocket which exploded.

Robert Buch, 16-year-old Elizabeth, N.J., led who made his first flight eight months ago, will take off soon in his Pitcairn biplane in an attempt to lower the junior coast-to-coast flight record. He is a friend of Eddie Schneider, 18, present holder of the transcontinental mark.

MINISTER OF AGRICULTURE

Only Averages Open On Our Atlantic Coast At Certain Seasons

Halifax, N.S.—Emphasizing the importance of the Maritime ports of the Dominion in relation to the Dominion at large, Sir Henry Thornton, president of the Canadian National Railways, reminded his hearers at a luncheon given in his honor here, that at certain seasons of the year the harbors of the Maritime provinces are the only avenues of ingress and egress on the Canadian Atlantic coast.

To contemplate any separation of the Maritimes from the rest of Canada, said Sir Henry, "would be to contemplate economic suicide." The position of the Maritimes economically, he added, was the best in the Dominion today. He pledged the most full co-operation and support of the C.N.R. in development of the port and province.

Hon. Robert Weir, Minister of Agriculture in the Federal Cabinet.

Staff Reduced When Resources Handed Over

Accounts Can Be Handled By Smaller Number Of Clerks

Edmonton, Alberta.—No ceremony of any kind marked the formal transfer of Alberta's natural resources. Twenty-eight officials, clerks and stenographers in the Dominion Lands office here, found themselves out of employment, as transfer of the resources was made.

Hegins, Sask.—Effective reduction of staff to permit financial savings by the administration of the natural resources, forecast by Premier J. T. M. Anderson in a statement issued as the provincial government took over the natural resources of Saskatchewan.

The transfer of the natural resources involves the transfer of about 20,000 accounts for grazing, logging, mining claims, timber permits and contracts, land sales and contracts and school land contracts.

Won Citizenship After Long Court Battle

But Woman Refused To Take U.S. Oath For Naturalization

Lima, O.—Mrs. Carl Landis, Philadelphia, who refused to take oath to U.S. citizenship, was finally granted citizenship by the court. She took the oath of allegiance, reserving her position to her husband, she would serve as a nurse and shed her blood if necessary in time of war.

Common Pleas Judge A. M. Rogers admitted the reservation and granted citizenship to the applicant of the assistant supervisor of naturalization.

Mrs. Landis came from Alliance Loraine in 1910, and was married since she began her fight for citizenship.

Eleven Burned In Explosion

Vesley, Guanajuato, Mexico.—Eleven persons were badly burned as a 3,000 skyrocket exploded in San Miguel cathedral during the celebration of the San Miguel Saint's Day. The explosion, which had been in the church for the celebration, were ignited by a skyrocket which exploded.

Maritime Ports Are Important To Canada

Only Averages Open On Our Atlantic Coast At Certain Seasons

Halifax, N.S.—Emphasizing the importance of the Maritime ports of the Dominion in relation to the Dominion at large, Sir Henry Thornton, president of the Canadian National Railways, reminded his hearers at a luncheon given in his honor here, that at certain seasons of the year the harbors of the Maritime provinces are the only avenues of ingress and egress on the Canadian Atlantic coast.

To contemplate any separation of the Maritimes from the rest of Canada, said Sir Henry, "would be to contemplate economic suicide." W. N. U. 1558

May Challenge For America Yacht

Plan Is Urged For Canadian Yacht To Make the Attempt

Entry of a Canadian yacht, particularly one from the Nova Scotia yacht squadron, located at Halifax, as a challenge for America's Cup, has been mooted, now that the "Shamrock V" has been so decisively defeated by the "Enterprise".

Under the present rules of the race club which has their courses upon the sea, or upon an arm of the sea, may enter the races, and, in any case, the challenger must proceed to the scene of the races under her own sail. This would seem, according to sportsmen, to point to Halifax as the logical location from which a contender for the cup should come. It is the belief of local yachtsmen that financial backing for such an enterprise would not be found wanting.

Should an attempt for America's Cup be made, it would be only the third time in the long history of the races that a Canadian yacht entered. The first attempt was made by the "Countess of Dufferin," and resulted in failure. The second try was made by the "Atlantia," five years later. This resulted in considerable ridicule owing to the fact that the "Atlantia" had to be towed through the Erie Canal, and her draught was too great for the artificial waterway. The result, however, as her hull-tanks dragged her through the canal she came to one side, and made ridiculous pictures. As the outcome of this, the ruling that only ocean-going yachts might compete was brought down, thus eliminating all clubs on the Great Lakes from the series.

In view of the "Shamrock's" defeat, a strong effort to have a Canadian yacht represent Canada in another race for the cup will be made, according to yachtsmen.

Soy Beans Are Valuable

Holds One Of Foremost Places As Forage Crop

The commercial demand for soy bean oil or meal from time to time will fix the value of the various varieties suited to cultivation in Canada is the observation of the chemist of the Dominion Department of Agriculture.

Relation between "oil" or fat content and "protein" and vice versa. This becomes a matter of importance in view of the fact that there are now some twenty-four varieties of soy bean which have been found suitable for cultivation as a commercial crop in Canada. The commercial value of the soy bean arises from the oil obtained by expression, and the use of the residue of the bean, which is rich in protein, in the form of meal or cake as a livestock feed. Soy bean oil is used in fish canning, paint and soap manufacture; and the soy bean is also an important constituent in many of the popular patent foods now appearing on the market. In addition, as a legume and forage crop it ranks among the best.

Rainbow Trout

Over 201,000 Fry Collected At Waterton Lakes Park

Over 200,000 rainbow trout eggs were collected in Cameron Lake, Waterton Lakes Park, Alberta, this summer by the fish culture division of the Department of Fisheries, or six times as large a collection as was made in 1929, when rainbow eggs were first collected in that district. The eggs were placed in the Waterton hatchery. All told, 320 fish were stripped between June 5th and July 2nd, and yielded a total of 201,060 eggs.

C.P.R. Cattle Win

Western Canadian cattle almost swept the boards in 16 classes at the Washington State Fair, just concluded at Yakima, Wash., when the Holstein show herd owned by Canadian Pacific supply farm at Burnham, Alberta, won 14 first prizes and nine seconds, and also carried off senior, junior and grand championships in both male and female classes.

"What did you think of my medicine?"
"Excellent! I am no worse."
—Montquie, Charleroi.

Tourist Business Brings Revenue

Fourth Largest Industry Has Doubled Within Five Years

While the tourist business this season may not equal that of 1929, this fourth largest industry has doubled in five years' time, according to C. W. Johnston, Montreal, general passenger traffic manager for the Canadian National Railways. In 1929, Mr. Johnston pointed out, this business provided a total revenue of about \$300,000, most of which came from American visitors who left in this country 40 per cent. of the vast sum they expended in pleasure and business travel outside of the United States.

"As a result of the economical situation across the line, a number of those who previously travelled extensively in Canada did not return this year, but, on the other hand, many Americans visited here for the first time, and, generally speaking, the tourist trade has been more than fair, to say the least," said Mr. Johnston.

"As to the transportation industry, which today the airway and highway travel is a factor, too, it may be pointed out that the railways have more than ever established themselves as the main supporters of the whole economical structure. Their contribution to the transportation industry has been so great that they remain the major one. Their thousands of employees, through betterment of their wages, have continued to improve their standard of living, and, generally speaking, the Canadian railways' financial performance and outlook has improved considerably."

Livestock Men's Turn

With Low Prices For Grain, Stock Raising Should Prove Profitable

A strong trend toward livestock has set in. While agricultural prices in all the major lines have dropped since last year, the relative price level for livestock is most favorable compared with the level of feeding stuffs. The next few years seem to promise to be the livestock men's turn.

Notwithstanding the effect of dry weather conditions in some parts of the Dominion, Canadian feeding stuffs are in more than average volume. The hay crops everywhere were satisfactory and some places exceptionally good. There is an unusually heavy carryover of barley and a low extent of oats and the low price ruling for all feeding stuffs is stimulating livestock production. All the indications are that livestock is at the beginning of an upward swing. If production is well planned now, it should do much to offset the loss to farmers through the low prices of grains, though good productive planning needs a "long view" of conditions, not of prices for stock or feed during a particular season only.

Great Bear Lake Seizure

The eastern part of Great Bear Lake in the Mackenzie district of the North West Territories, Canada, is a magnificent system of flora and landlocked channels, not unlike the west coast of Norway.

Children of the village school in Kingston, Mania, England, sing in seven languages—English, German, Italian, French, Finnish, Greek and Hebrew.

Suitable For Fruit Growing

Peaches Successfully Produced On Farm At Congress, Saskatchewan

Wm. C. Buckle, Saskatchewan, Minister of Agriculture, has had the pleasure of tasting a number of Saskatchewan-grown peaches. Though he didn't get around to taking the odds of them, there were also Saskatchewan watermelons and melons. All were grown on a Vinecroft Farm at Congress. The farm is owned by R. V. Sulla, but the fruits were grown by Thomas Linton Price, four years out from Ireland.

According to Mr. Price, he planned to send Mr. Buckle a sample of huckleberries, peanuts, 25-pound radishes, 1,200-pod beans to one plant and a new climbing cucumber he had developed. His peaches, said Mr. Price, he guaranteed to develop from seed in 80 days. He was positive that Saskatchewan soil could produce such fruits in other places than Congress also.

Mr. Price said he has been laboring in the interests of the Department of Agriculture of Saskatchewan since his arrival. He plans to return to his home in Belfast, Ireland, in two months time.

Making Milk Attractive

Children Likely To Take It Profitably If It Is Made Attractive

Markets provide a ready field of viands, and food experts daily point out ways of preparing food attractively, but this is the common idea of child whose bill of fare is more or less restricted to milk and spinach.

Most children adore spinach, and a great many of them stubbornly refuse to drink milk. The benefits of milk when forced on a sobbing, reluctant child are questionable, to say the least, and an enterprising mother will dress it up, flavor it and even make up fancy names for it in an effort to make it attractive to her child. There is practically nothing she can do toward making spinach appealing.

With several cereal beverages on the market today which are suited to the needs and taste of children, the resourceful mother will find it easy to prepare milk so that the children will actually enjoy it. These cereal beverages, made with plenty of milk, sweetened to taste and served hot, are healthful.

Didn't Register With Her

The buttonless husband contemplated his jacket which he couldn't do up. It occurred to him that he might get something done by a little appropriate saying.

"So, as he was just about to re-approach with his wife, he remarked: 'Oh, by the way, remind me to get some needles and thread when we're out, dear.'"

His wife gave a dazzling smile. "You silly, extravagant boy," she smiled, "you can always borrow mine, you know."

The Magnetic Pole

It is interesting to note that the location of the north magnetic pole by Major Burrows' Canadian expedition, near Cape Adelaide, on Ellesmere Island, is approximately where Annandale placed it from observations which he made between 1903 and 1905, viz. 73 degrees north latitude, 96 degrees west longitude.—Boston Transcript.

Manufacture of typewriters is being started in Poland.

Mammoth Farms

Dr. Allen Of Saskatchewan University Decries Report That Wheat Factors Were Fed

"We have never stated that wheat factors would replace the present farming," said Dr. Wm. Allen, president of the farm management department of the University of Saskatchewan.

Statements have appeared in the press that the group of 30 agricultural authorities, economists, and engineers, who recently toured Montana, North Dakota and south-western Saskatchewan, had reported in favor of the mammoth farms as likely to supplant the family size of farm.

The group who made the tour has made no report as a group as they consisted of a number of individuals making their own investigations. Neither Dr. Allen nor Professor R. C. Haack, chairman of the party from Saskatoon, were convinced that the mammoth commercialized farm would supplant the family farm under Saskatchewan conditions.

Lower cost of production per bushel of wheat was found on many of the large farms, but the family size farms than on the mammoth farms visited in Montana. "The Saskatchewan and Montana conditions are entirely different," said Dr. Allen.

This does not, however, mean that many farms are not too small to be economical units," he added. The changes in farm machinery have increased the size of the unit that can be best worked by a family.

The Creative Faculty

What Young People Must Need If Familiarity With Their Native Tongue

There is impulse behind the creative impulse, indeed that seems to require a set of harness on it before it can accomplish anything: good writing, good music, good painting that has gone before, and then carry on from there. In the case of children, emancipating them from the usual discipline would be especially bad, as few of them will ever be professional writers, and what they most need is familiarity with their native tongue, and that is actually used so that in later years they will at least be literate and able to earn their living. When a girl is eighteen and loses her first job because she cannot spell it will not be very comforting to her to know that at the age of eight she looked out a sweet little poem on her doggy and her kitty.

—New York World.

Prairie and Yukon Fisheries

The product of the fisheries of the Prairie Provinces and Yukon Territories in 1929 was valued at \$4,675,065, compared with \$3,580,522 in 1928. These figures represent the value of the fish as marketed; Manitoba in 1929 contributing \$2,745,205, or 67 per cent; Alberta, \$732,214, or 14 per cent; Saskatchewan, \$373,871, or 14 per cent; and the Yukon Territory, \$24,805, or 1 per cent. Whitefish was the chief catch, representing 24 per cent of the total value of fisheries production.

Died Penalties

Harry McNeil, member of two Antarctic expeditions, with Captain R. F. Scott and Lieutenant Sir Ernest Shackleton, died recently at Wallington, New Zealand, premises at the age of 64.

Keeping Tab On Salmon

Impressive March Part Of Over 8,000 Sockeye In Willamette

An impressive march part of over 8,000 sockeye salmon was seen recently at Blamp River. The fish took from June 11th to July 20th to pass the falls by aid of the falls constructed by the Canadian Government Department of Fisheries. A count of the fish was made by the Government Fisheries Guardian at the falls during ten hours of each day in the six week period. As compared with the number of sockeye using the falls in the corresponding period of 1929, there was a very large increase this year. In 1929 the total was 3,512 as against 9,061 this year.

The fallway overcomes a height of some forty feet of turbulent, crashing water and is a means of ascent for many salmon which might otherwise not be able to battle their way to the spawning area. This year a very large number of sockeye have been able to make their way over the natural falls.

The coastal and inland waters of British Columbia are among the most productive salmon fisheries in the world, and the quality of the salmon carried there is unsurpassed.

Noted British Persons

Have Actual Doubles

At Least Three Who Closely Resemble Lloyd George

Many of London's great, and nearest have doubles. George Bernard Shaw has a double in a pavement artist who usually has two pictures, one of himself and the other of the famous writer, up his stand with the chalked inscription: "Which is which?"

A bus driver looks enough like Home Secretary John R. Clynes to be a twin. Lord Birkenhead's double is a well-known professional man, and an underground railway official is the image of Arnold Bennett.

Lloyd George has at least three doubles, while recently a man rushed up to a prominent first-nighter whom he mistook for H. G. Wells, to congratulate him on his latest book.

Rust Dusting Pays

Rust Respects Experts Tell How Best Can Be Controlled

A decided increase in yield in favour of the dusted crops is reported by rust research experts of the Federal Department of Agriculture. Experiments show that the aeroplane is well suited to the dusting of large areas. Not only can rust be controlled by dusting but even in the absence of severe rust infection the beneficial effects of dusting are evident. Sulphur dust is found particularly effective in the control of rust and leaf diseases. In practically every case there was a decided increase in yield in the dusted crop.

Saskatchewan Pool Elevators

Saskatchewan Pool Elevators Limited, this year are operating 1,034 elevators, a total of 1,000 owned by the company; 14 being chaff and 12 under re-construction. The pool elevator system came into existence in Saskatchewan for the crop year 1922-23, when the company handled 11.26 per cent of the pool grain of the province, and this had risen by the year 1928-29 to 94.1 per cent.

Poetal savings in Japan are \$160,000,000 greater than a year ago.

Gulf Stream Benefits Iceland

Warm Water Creates Climate Similar To Southern Canada

Iceland's sea nature naturally suggests to the prospective visitor that he will find a frozen waste. When his map shows this island to lie across the very threshold of the Arctic Ocean, he is by the glacial coast of Greenland, and 300 miles further north than bleak Labrador, he is almost prepared to expect a land of ice and polar bears and of fur-clad folk living in snow igloos. But Iceland is labelled both by nomenclature and maps, according to the National Geographical Society.

"On many charts the most important physical fact in Iceland's life does not appear," a recent bulletin of the society says. "Up from the south flows the warm Gulf Stream to enclose the island and work the magic of whisking it, in effect, nearly a thousand miles toward the Equator; so that the climate, which is that of a polar region, but of Southern Canada or Northern United States."

Iceland's coasts are thriving with towns with buildings of stone, gables, roofs and church steeples, busy streets and electric lights. In the towns, the climate is even warmer than in the country. Here, as much as are the inhabitants of Copenhagen and Glasgow, Ottawa and Minneapolis. One's eye tells him that here is the same civilization that Europe and America know.

"And immaterial factors proclaim the truth," the bulletin unmistakably states. "Here, in this northern land, a worthy national literature and stable national life have developed, when much of Europe was foundering in the Dark Ages. Here the lamp of the Renaissance burned and lighted its way to the dawn of the Latin Renaissance was held aloft to light the way for the world. This northern light has never failed. Today the literary rate is higher in Iceland than in many countries of Europe."

"The people of Iceland have a great literature of their own in the old sagas, and many of their modern poets are especially gifted. Their folk songs are popular throughout the country and rank with the best of any nation."

Holstein Record

Moore Jay Herd Makes New Of Records In H.O.P. Test

B. H. Thompson of Moose Jaw, a leading breeder of Holstein cattle in Western Canada, and a director of the Holstein-Friesian Association, has just finished making a number of records with a group of five cows and heifers, members of his best herd, which make an excellent showing. These five individuals, qualifying in the H.O.P. all but one the 365-day division, gave a total production amounting to 73,032 pounds of milk, containing 3,256 pounds of butter, an average per animal of 14,600 pounds of milk containing 651 pounds of butter.

Best Guide To Conduct

Nothing is As Satisfactory As Following the Golden Rule. It is the very best guide to human conduct in all relations in life. It is the best in business. It is the best in society. In truth, in every relation and aspect of life the Golden Rule is without equal or superior.

Chinese Library At McGill

Wm. C. McGill, the Great Chinese Library at McGill University have reached the 110,000 mark, according to a report by the curator, who points out that Chinese volume count has three to four times the amount of written matter contained in an English library of the same kind. A Chinese character represents, in some instances a whole English sentence.

"We shall have to perform a little operation."

"A large one. Remember the patient a millionaire."—Buen Humor, Madrid.

DORNIER SEAPLANE DO-X PREPARING FOR GREAT DASH

Hovering alternately over land and water with occasional swoops down upon both, the giant Dornier seaplane DO-X, flying shark of sea and air, goes about the business of preparing for its epochal dash across the Atlantic to the new world. Luxury of a kind never yet approached in trans-Atlantic air travel is assured the men and women who are scheduled to blaze the trail in the magnificently-fitted air-water liner. Dr. Claude Dornier, designer and builder of the DO-X, and Captain Friedrich Christian Christensen, its commander, have expressed themselves as completely satisfied with the preliminary tests. In addition to Commander Christensen and Maurice Dornier, the ship is expected to have two engineers, electrician, steward, five mechanics, wireless operator, and two passenger correspondents.

Above view of DO-X flying over water, at about 135 miles an hour, gives one an idea how it will appear upon its flight to America.

Livestock Is Shown To Be A Prime Factor In Economic Development Of The West

A popular idea is that revenue in the Canadian prairie provinces is derived almost wholly from grains. A second idea is that the growth of home breeding is due to the increase in production at the expense of livestock and cut down drastically the number of head of livestock between the Great Lakes and the Rocky Mountains. Both ideas need considerable revision.

The rapid settlement of the Prairie Provinces made possible by grain growing has been accompanied by an increase in livestock that has more than compensated for the reduction in ranches, so far as numbers are concerned. Self-sustaining farming demands the raising of livestock, and the change in the West in this respect within the past decade or so has been remarkable today, though in the livestock industry in Manitoba, Saskatchewan, and Alberta has only touched the edge of possibilities. The raising of cattle, sheep, and swine on farms is an important percentage of the whole in the Dominion.

It is interesting to find that, generally, for its lands to spread agricultural wealth more evenly over the season than is possible with grain farming only.

The four western provinces have now more than three times as many cattle, more than twice as many sheep and nearly eight times as many swine as there were in the most palmy range day. Comparative figures for the year 1901, when complete records were first gathered, and 1929, are as follows:

Year	Cattle	Sheep	Swine
1901	1,056,627	215,998	211,794
1929	3,524,040	1,114,115	1,728,603

It is interesting to find the figures representing the livestock production of Western Canada for the last eight years. In arriving at the total it is difficult to gauge the number of head of livestock slaughtered on farms for home use and by local butchers and at small, unimportant killing plants. The Dominion Bureau of Statistics finds that in the case of cattle imported, slaughterings run about fifty per cent. of the yearly estimated total kill in Canada, hogs about forty per cent., and sheep about forty per cent. By making the necessary adjustments, therefore, on the inspected slaughterings in the West, one arrives at a fairly close estimate of the local or unimportant killings may be made.

Total figures representing some seven and one-third million cattle, over eighteen million hogs and about two and three-quarter million sheep look the credit of Western Canada at first glance. When it is found by further figuring that for the same period 15,888,097 cattle, 47,481, 506 hogs and 10,906,429 sheep and lambs are the estimated total killings in the whole Dominion of Canada, a slightly different picture of the picture is presented. Continuing with the comparison it is seen that Western Canada produced roughly 46 per cent. of the total production of the swine and about 25 per cent. of the sheep and lambs.

In this a fair share of the total, or could Western Canada, everything considered, have been expected to produce a greater percentage of the total? If only livestock production is considered in terms of acres of land under cultivation and suitable for cattle production one might form the opinion that the West should be marketing two-thirds or three-quarters of the Canadian total, but when the hundreds of millions of bushels of grain that Western Canada ships annually are considered the conclusion is reached that while there is room for great ultimate expansion of the cattle industry there, the West is possibly for the moment carrying a fairly heavy load.

Swine production figures, however, are not so easily disposed of in that manner. The fact that no much

"Look, please, please."—Laurie Rache, Leipzig.

W. N. U. 1858

grain is being produced on the prairies would lead one to believe that the West should be the source of the heaviest hog shipments in the Dominion, for swine production goes hand in hand with grain production. It is an axiom that nowhere can hogs be produced more cheaply than at the fountain head of the grain supply.

Yet Eastern Canada, with very small grain fields, although having a certain advantage in the matter of dairy by-products, turns out nearly two hogs for every one that comes from the West.

The following table, showing number of bushels of wheat and all other potential feed grains produced for every bushel of grain shipped, the various provinces respectively, indicates that hog production in the older provinces has become more of a sideline than the raising of their grain supplies, but it also points out the possibilities open to swine men of the West.

Province	1911-1912	1912-1913
Maritimes	107	118
Quebec	70	81
Ontario	109	110
British Columbia	104	90
Manitoba	650	498
Saskatchewan	650	571
Alberta	384	281

With such low hog production in relation to grain supplies it would appear that the West has a large amount of grain available to increase hog production in the East but great advances in refinement and processing reasonably be expected in the not distant future from Saskatchewan, Manitoba and Alberta. The difficulties attending the raising of the immense quantities of low grade wheat and feed grains of the 1928 crop, and the expense of more serious consequences on the moving of the short high grade wheat crop of 1929, are also the feed grain crop consumed in fact-testing Western farmers the idea of turning over of them feeds at the greater rate of production obtainable through cattle and sheep.

Some agitation was caused by the fact that last year Canada's net imports of lamb and mutton were over three and three-quarter million pounds, and the production of lamb and mutton in this country is only about 6.5 lbs. Does not this point out an opportunity for a substantial increase in production of these meats, first, to meet the competition of the imported product and secondly, to increase the value of the meat? It is interesting to find that the average family man in Western Canada with only 25 per cent. of the total production of the West in this respect, as sheep are probably the best livestock to assist in the rearing of lamb and mutton and dirty grain farms.

Canada should be able at least to feed all her people entirely on Canadian products, and the products should be able to produce them at competitive costs with any other country. The West has the most everything necessary to insure success in this competition; the one essential thing lacking at present seems to be a definite program and plan of production.

The Method In Ireland

People Resort To Tricks When Hunters Disturb Them

Tired of the "careless hanging" of the guns of game hunters, people living in the vicinity of a lake in Cork, Ireland, restored peace by a series of stones, bricks and rods. Since the opening of the hunting season there was a fusillade at dawn and dusk. As the district is not regarded as a public road, for which the City officials told the protesters that they were powerless and the City Corporation met and gave the same reply. Alderman Daly moved to request the Minister of Justice to issue an order desisting the lake a sanctuary. But the peace-seekers could not wait that long. When the sportsmen next appeared, men, women and children met them with a fusillade of missiles. Sportsmen and dogs beat a hasty retreat, some men dropping their guns as they ran.

Owned Valuable Coin

After walking around for several months with a \$20 gold piece minted in 1847 in his pocket, Clark La Bounty, of Toledo, decided he'd look up the coin in a catalogue and see how much it was worth. You could have knocked him down with a feather when he read that because of the peculiar thickness of the design it was worth \$2,500.

North America is next to Africa, the chief gold-producing continent, usually contributing about one-quarter of the world's annual gold output. Within the past decade the North American production of the yellow metal has rather more than held its own, but this showing has been due entirely to the fact that Canada's rising output has been sufficient to offset the declines in the United States and Mexico. Ten years ago the gold output of the United States was three times as great as that of the Dominion. Today the two countries are almost on a par in that regard.

Sheepmen's Opportunity

Demand For Mutton and Lamb Is Steadily On the Increase

Reports from some leading sheep producing countries is that a reduction in the flocks is taking place. The Bureau of Agricultural Economics in the United States believes the decrease will continue for the next two or three years. This should suggest to Canadian sheepmen a policy of "staying in." Our total sheep number is insignificant compared with the estimated total of about 700 million for the whole world. Still more so for the country, it is actually too small for a country of ten million population in which the demand for lamb and mutton is steadily going up. The per capita consumption of these meats is still a long way from being equal to that of some other countries and the indications are for a steadily growing demand for good quality Canadian lambs for a long period.

In the United States the unwisdom of going out of sheep too strongly is hinted at by the Bureau, which states: "The individual producer is advised to consider carefully his feed supplies and the long-time outlook for the sheep industry in making his plans for next year. Where feed supplies are available he may find that present conditions offer a good opportunity for improving the quality of his breeding flock."

Predicts Growth Of Dairying

Manitoba Dairy Commissioner Notes Steady Increase Of Industry In The West

L. A. Gibson, dairy commissioner for Manitoba, states that he never saw a better show of butter than that exhibited by Manitoba at the Toronto Exhibition. He noted a steady growth of interest in the dairy industry of the West, and pointed out that in Manitoba alone the sale of better, cheese, cream, milk and other dairy products amounted now to \$15,000,000 a year. He believed that the next few years would witness an even greater growth in dairy production.

World's Grain Show

Many Countries Have Signaled Their Intention Of Being Represented

Belgium has officially accepted the invitation to take part in the World's Grain Exhibition and Conference, Regina, from July 25th to August 6th, 1932. Some little time ago official invitations were sent from the Dominion Government to all countries inviting them to participate and a number of these have already signified their desire to do so. They include Peru, Jugoslavia, Czechoslovakia, New Zealand, Poland, Czechoslovakia, The Netherlands and Belgium.

The first sandwich from an ox dead for over 2,000 people at a restaurant shortly after at Colpit Heath, England, was sold for £275.

New Variety Of Barley

Is Practically Barless and Gives Yield The Area

There should be more barley grown on Canadian farms, especially dairy farms. Tests made in several provinces have shown again and again that barley, on the average, produces more pounds of feed per acre than does oats and that the feed is worth more per pound. And yet the crop is not commonly grown. The reason is not far to seek. Few people care to wage war with barley heads. They would rather take the smaller returns per acre from oats than undergo the discomfort of threshing barley and handling the straw through the winter. This battle with barley heads, however, is no longer an argument against barley. The new smooth awned variety gave an average yield of 39.37 bushels per acre as compared with 35.17 from the Ontario variety. When it is considered that barley fits as well into the cropping system as does oats and that it is a better nurse crop for grasses and clovers the argument for a larger use of the crop would seem to be complete.

Reclamation Scheme

Proposed To Reclaim 700,000 Acres In Carrot River District

Formation of an organization similar to the On-to-the-Bay Association to advance the proposed reclamation scheme for the Carrot River District was urged by H. F. Bickle, prominent farmer, in an address before the local Rotary club at The Pas. Quoting Federal Government and other reports, Mr. Bickle outlined the various schemes proposed to turn the triangle into a great farming country. The triangle lies southwest of The Pas and most of its area is in Saskatchewan. It consists of about 1,068 square miles, or approximately 700,000 acres. Mr. Bickle pointed out that President Anderson of Saskatchewan, had promised to give the matter consideration after that province had been admitted to the Dominion. However, he asserted, an active association is needed in northern Manitoba to keep the project alive.

Manager: "You're late today, Miss Brown."

Typist: "Yes, sir; I fell down stairs."

Manager: "Well, that didn't take long, did it?"

Certain kinds of water plants are deadly foes of breeding mosquitoes, and one species of waterweed, the bladderwort, actually swallows and digests the wigglers.

GERMAN BATTLESHIP "HESSEN" FIRING A BROADSIDE

Photograph taken during the recent German manoeuvres shows the "Hessen" firing a broadside. The manoeuvres are at Kiel Right.

Veteran Canadian Explorer Returns To Atlantic With Relics Of Franklin Expedition

Stated that all the information which it is humanly possible to discover regarding the fate of the Sir John Franklin party, which perished among the Arctic islands off the mainland of Canada 33 years ago, has been gleaned, Major L. T. Burwash, veteran explorer, returned to Ottawa with a number of relics.

His discovery in an abandoned camp on King William Island, between Victory Point and Lady Jane Franklin Point, added little to what was already known, beyond definitely establishing the locale of at least one staying place in the long trek which appears to have ended hundreds of miles south, on the Canadian mainland, near the mouth of Black's River.

The fragment of a canvas tent, circular in shape, and lending color to the assumption that this portion had been frozen to the ground while those occupying it had torn away from the remains, pieces of naval broadcloth, some inch-thick rope, and the rusted blade of a knife constituted Major Burwash's find. He encountered two graves on King William Island, but from these nothing could be gathered. Of the grave of Sir John Franklin himself, no trace was found.

In spite of the 30-odd years that had elapsed since the two ships, "Erebus" and "Terror," set out in an attempt to discover the North West Passage, a certain fascination continues to surround the fate of their crews. For 70 years a veil of silence has shrouded them and only one small scrap of paper has ever been discovered relating to the expedition.

It was the report and message found on King William Island by the search expedition of Captain McClintock in 1857. The message, signed by Sir John Franklin, announced how the two ships had wintered at Beechey Island in 1846, and that all was well. That message, however, on the paper written by another hand at a later date, conveyed the information that Sir John Franklin had died in June 1847. The notes gave the strength of the party as 105 and they proclaimed the intention to essay an overland journey from King William Island to the Canadian mainland at Black's River.

Raise More Geese

Good Returns Obtained On A Very Small Investment

Geese raising does not receive the attention by the farming community that the business warrants, assert poultry experts of the Dominion Department of Agriculture. The farm is the natural habitat of the geese, providing those two great essentials to successful geese raising — free range and an abundance of green food. Raising a flock of geese is one means by which the farmer can reap a good reward with a very small investment and comparatively little labour. Geese command a good price on the Christmas market and the demand is always greater than the supply.

Finds Five Daughters Expensive

Pleading guilty before the city magistrate of Mysore, India, to the theft of jewels from the Prasanna Krishnaiah Temple, the high priest testified that his salary was only \$7.80 a month. He added that he had been "cursed" with five daughters, and as his husbands were not able to keep them, he was compelled to maintain their families as well as his own.

Somebody has been asking, "What becomes of pins and needles?" The answer is that they disappear after a brisk rubbing of the affected part.

That this trek was attempted is clear from Eskimo tradition. In 1850, Dr. John Rae of the Hudson's Bay Company, surveying the coastline, was bought by the Eskimos, encountered natives who were then using tableware and other utensils which bore the mark of the Franklin expedition. They informed him that years before a group of white men had been seen struggling across the ice to the mainland. "Dying as they walked." Verification of the Eskimo tradition was secured at Starvation Cove, where later expeditions located about 40 graves.

The purpose of Major Burwash's flight to King William Island was, in part, to verify, if possible, the story of an American mining expert, named Jennie, many years ago, originated a report concerning the Franklin party which would, if correct, have thrown new light on their fate. "This story, in document form, was bought by the Department of the Interior, from T. W. Jackson, of Vancouver, B.C. In his report to the minister, Major Burwash definitely established that the Jennie story was without foundation.

With two companions, Pilot Gilbert, of the Western Canada, Major Burwash, near the mouth of the Copernicus River, to Boothia Peninsula — the magnetic pole — and thence to King William Island. Landing in a fresh water lake, British Columbia, he prosecuted his search between Victory Point and Lady Jane Franklin Point. Having made his discoveries, he returned by air to Coppermine, thence south to Great Slave Lake, Fort Smith, and McMurdo.

Over 2,000 photographs were taken by Mr. Plimie during the flight. These will be of great value to geographers in correcting many inaccuracies regarding the coastline of the mainland and the islands over which the party walked. One example, near where it is believed one of the Franklin ships sank, is not an island, but an archipelago comprising hundreds of islands. Other discrepancies were noted.

Important Work In Connection With Demarcation Of 5,000 Miles Of Boundary

In carrying out its duties of maintaining in a state of effective demarcation the 5,000 miles of international boundary between Canada and the United States, in accordance with the provisions of the Treaty of 1925, the International Boundary Commission, the Canadian section of which functions under the Survey Bureau of the Department of the Interior, has this year a number of important operations on hand. These include reopening the vista and repairing the monument, some thirty miles of the highlands boundary between Quebec and Maine, making surveys for the revision of certain of the boundary maps between British Columbia and the state of Washington, and erecting monuments at the point where an important international highway between Kelowna, B.C., and Portland, Oregon, crosses the boundary. It also intended to locate and mark the boundary in the new Detroit-Windsor tunnel before it is officially open for traffic.

Out Of Luck

The husband came home and was greeted at the front door by his wife. "Did you get the new maid?" he asked.

She shook her head. "No, I'm afraid not, dear," she answered.

"Weren't there any at the registry office?" he went on angrily.

"Yes, darling, but we've had them all before," was the rejoinder.

Cowardly Bulldog: "Help! Help! I am killing myself!"—Buen Humor, Madrid.

INDIGESTION

Banished by Kruschen

"I suffered for some years from a bad stomach. I used to feel very miserable after meals. The doctor advised me to take Kruschen Salts, but it did me no good. I decided to try Kruschen and now I am eating and have done for the past 12 months, and I am very glad to say that my stomach is now in perfect order. I feel as young as I was 20 years ago, thanks to Kruschen (W.V.). You know how badly an engine runs when it gets clogged up. It is the same with your body when your gastric or digestive juices fail to flow. What you need is a tonic—Nature's own tonic—Nature's six mineral salts.

You get all these six salts in Kruschen. The first effect of these salts is to promote the flow of the saliva and to awaken the appetite. The next action occurs in the stomach, where the digestive juices are encouraged to pour out and act upon the food. Again, in the intestinal tract, certain of these salts promote a further flow of these vital juices which deal with partly digested food and prepare it finally for absorption into the system.

WORLD HAPPENINGS BRIEFLY TOLD

Bound for Germany to negotiate a settlement for accounts outstanding between the country and Canada. Hon. C. H. Cahan, Secretary of State, sailed recently from London.

The London Daily Herald reported that King George recently visited to confer a title upon George Bernard Shaw in recognition of his literary eminence, but that Shaw had declined.

Prince Leopold, of Bavaria, field marshal of Germany and commander of the German army in the east during the earlier stages of the war, is dead. He was 84 years old. Death was caused by pneumonia.

The first woman accountant in the province of Quebec was received into the membership of the Society of Chartered Accountants, when Miss Charlotte N. Howell was presented with her entrance certificate.

Critics in Great Britain have derided so much that prisons are operated far below capacity and several have actually closed for lack of occupants. States Dr. Higgins, medical officer of the prison in Liverpool.

Order-in-council granting a loan of \$50,000 to the Manitoba Cattle Loan Association was passed by Manitoba's cabinet council. The Secretary secured the money at five per cent, and will charge members seven per cent. for advances secured by lien notes on cattle purchased.

The parliament of New Zealand has approved a scheme to establish a national art museum to include a war memorial and a carillon. The citizens of Wellington have subscribed \$500,000, and the government has granted a subsidy of the same amount.

Frederick Edlin Smith, the first Earl of Birkenhead, statesman, 58 years old, died in London, England, Sept. 30, following a lengthy bronchial ailment. He was at one time British Lord High Chancellor and Secretary of State for India. During the war he was prosecuted Sir Roger Casement, Irish leader, who was hanged for his wartime activities.

Shipbuilding in Sweden

Sweden Maintains Lead in Industry Among Scandinavian Countries

Sweden maintains its lead in the shipbuilding industry among the Scandinavian countries, according to the latest reports. At the Swedish yards 26 vessels with an aggregate tonnage of 127,000 gross tons were in the course of construction at the end of the first half-year. Denmark records second with 29 ships of 116,000 gross tons and Norway follows with 33 ships of 40,000 gross tons. Of the ships at present being built in Sweden nine are steamships, four motor ships, 2,000 gross tons each, four motorships of 2,000 to 4,000 tons, four motorships of 5,000 to 6,000 tons, and six motorships of 8,000 to 10,000 tons.

Shortest Name For Horse

Racer in England Answers to Name of "O"

There's a race horse in England named "O." This establishes a practically unassailable record for brevity. One suspects that its owner, Mrs. G. L. Redmond, an American, saw an opportunity to attract a little attention by thus naming the nag, although with so many horses running around these days owners have just about run out of names.

In the United States, there is a rule that a period of 15 years must elapse before a name once used by a race horse can be used again. Over in England the only restrictions are that you cannot name your horse after the winner of one of the "classics" nor for a living person without obtaining permission.

The "classics" are five in number, although the term is frequently abused, the Thousand and Two Thousand Guineas, the Derby, Oaks and St. Leger. Horses winning these races retain their individual names in perpetuity.

Winnipeg Newspaper Union

(By Eva A. Tingey)

72-77

DELIGHTFUL WEAR

All Tingey models are created and sketched in Paris and the patterns are made in London. If you are a woman who is wearing some long-sleeved little dresses for the cooler days here is a charming model. If long sleeves are not in demand then this model is equally suitable because the lower sleeve can be removed and the dress is short sleeves!

Very pretty is the dress carried out as the sketch in a fine knish weave in chamois or some similar thin woven or wool and cotton. The original in scarlet knish has yellow and gold and grey stripes—short sleeves! It is ready for wear here and there. Owing to its coloring and trims the model assumes a slay peasant air. It is dainty and charming in its short sleeve form in cotton and washing silk. This pattern may be obtained from the dressmaker, or from the pattern and size you want.

Tea Biscuits unusually good when made with Magic Baking Powder

If you bake at home send for the New Magic Cook Book. It will suggest many attractive dishes and save time for you.

Look for this mark on our Magic Baking Powder. It is the only one of its kind in the world.

2 cups flour
1 cup sugar
1/2 cup butter
1/2 cup milk
1/2 cup Magic Baking Powder

2 tablespoons shortening
1 egg, well beaten
1/2 cup milk

Place mixture of flour, sugar, butter and salt, then add in shortening. Gradually add milk with a spoon or a dough as it is needed, using a knife to mix with.

Place mixture of flour, sugar, butter and salt, then add in shortening. Gradually add milk with a spoon or a dough as it is needed, using a knife to mix with.

This fine new standard in a recent Dominion-wide investigation.

Huge New Glacier Found

Ice Field in British Columbia May Be Largest in World

Bringing back a story of having discovered an ice field that will rival any previously known, Christian Hauser and Ernest Peus, Swiss guides of the Chateau Lake Louise and Banff Springs Hotel, arrived at Golden, B.C., by using train, motor and pack train.

With Major Longstaffe, of Vancouver, the guides reached the headwaters of the South Gate Littlewood and Toba Rivers, 160 miles north of Vancouver, in the Cascade range. The alpine state of the rivers convinced the explorers that the streams were glacial fed and so they penetrated the virgin country at the headwaters.

Huge snow fields and glaciers estimated at an area of 350 square miles, were seen and photographed for the first time. Ernest Peus states that what they saw is only a part of the huge glacial field there.

Try To Decipher Document

Second Andrean Diary Causing Experts Much Difficulty

Experts examining the documents found with the remains of members of the Andrean balloon expedition in icy Hivovien are having difficulty with the second of the Andrean diaries, which they believe contains the record of the last days of the trio.

It had been exposed during the 33 years since the death of the three men and its contents are well preserved by time and the elements.

"If you haven't a doctor," said the tourist at the hamlet inn, "what happens when anyone is taken seriously ill?"

"Oh, they just die a natural death."

Another Wonder Of Science

New Device Makes Breath a Kind of Music

As we have ceased to wonder at the marvels of science, it is not surprising to learn that inventors have found new uses for the human body besides just breathing, or blowing on one's hands when cold, or on a cup of tea when hot—assuming one is not taking tea when "company" is present.

Dr. E. E. Free, New York, consulting engineer and scientist, comes forward with a device which can be attached to many things, and all one has to do is to blow into a sort of telephone mouthpiece, and it will do a job of work. It makes the breath a kind of third hand when a person is busy.

For instance, if you are playing the piano, simply blow into the mouthpiece and it will turn a page of music. If trying, you don't need to lift your hand to shift the carriage, simply blow and the carriage will slip back. Blow again and it will open the door of your auto, or open the window. In a plane your breath may manipulate the controls. In the same way you may operate heavy machinery. In fact, there is almost no limit to the possibilities which a little "blowing" may accomplish. Only this is a purposeful sort of blowing, not mere window stuff.

Believe It Or Not

Mountain peaks in the Cariboo range are growing taller, according to fur traders at Fairbanks, Alaska. As proof, one trapper points out that he has found trees on mountain sides which high water marks on them from lakes and streams now hundreds of feet below. A government geological party has been asked to investigate the growth of the peaks.

Saving For The People

Says Saskatchewan May Save Over \$300,000 by Connecting With Freight Lines On Canada Goods

"People of Saskatchewan will save over \$300,000 this year on canned goods," states Hon. J. A. McCreary, Minister of Railways and Labor. The figure \$300,000 had been given to the department as the estimate of a large wholesale grocery firm with a warehouse in Regina, he said.

"The estimate will be very close to correct," Mr. McCreary said. The rates in effect would continue until the close of navigation on the great lakes and then the matter "will have to be fought out all over again," he added.

The government had received the support of the boards of trade of Saskatchewan, the Retail Merchants' Association, and the United Farmers of Canada in the fight, which had been on since July 4 and September 16, Mr. McCreary said in conclusion.

"The stalls," we are reminded, "do not applaud so heartily and unreservedly as the pit and gallery." No; they are the reserved seats."

In all situations there are only about 12,000 unemployed.

An Emergency Dressing

Minard's is invaluable as a quick dressing for burns, scalds and all skin abrasions. It cleanses and soothes the wound.

Dial's Auction Sales

Wednesday, October 15, at the farm of Mr. Ben Barber, situated on the south-half of Section 22, Township 23, Range 3, eight miles north-west of Hindhead and 18 miles south-west of Acadia Valley. Horses, farm machinery and household goods. Sale to commence at 12 noon. B. H. Dial, auctioneer.

"MELODY MIKE" TO BE BROADCAST.

Radio fans in Canada will be introduced to a new and original form of radio entertainment this winter with the inauguration of Monday evening hours from "Melody Mike's Music Shop," a broadcast over the Canadian Pacific Railway's transcontinental network.

"Melody Mike," as the above picture shows, runs a music shop near the station at a railway divisional point. The shop becomes the centre of numerous adventures in which Mike himself, Mary, his wife ("Molly Maloney, as we call her"), Ted and Larry, their sons, Scotty Macgregor, an argumentative but friendly neighbor, and Lashie-a-lay, quite the most surprising of the characters all play parts.

All are competent and enthusiastic musicians, and their adventures are sprinkled with charming music.

old-time favorites and popular song hits. Also, the best of their musical Monday evenings has spread far and wide the division, and when a train halts at Melody Mike's emporium, many of whom contribute to the enjoyment of the evening.

The first programme from "Melody Mike's Music Shop" will be broadcast from 9 to 9:30 p.m. on Monday, October 14th, by the following transmission system of the Canadian Pacific Railway's Telegraph, C.R.C., Montreal, C.R.C., Quebec, C.R.C., Toronto, C.R.C., London, C.R.C., Chatham, C.R.C., Winnipeg, C.R.C., Regina, C.R.C., Moose Jaw, C.R.C., Saskatoon, C.R.C., Fleming, Sask., C.R.C., Edmonton, C.R.C., Calgary, C.R.C., Red Deer, and C.R.C., Vancouver.

About Town and Country

The C.W.L. will hold a bazaar and sale of home cooking on Saturday, October 25.

The women's auxiliary of All Saints Church will hold their annual bazaar on Saturday, December 6.

Mr. Thos. Lees and Mr. James Lees left this morning on a business visit to Calgary. Bob Lees accompanied his father and will remain in Calgary to attend the school of technology and art.

Mrs. A. Mayers of Chinook visited her mother Mrs. Myhre over the week-end at the home of Mr. C. F. Damsgard at the Sinnydale district.

In the absence of Mr. W. Walsh, who is spending a few days in Calgary on business, Mr. J. Gall is in charge at the pool room.

Are you reading the new serial "The Dusty Highway" which commenced in last week's issue of the News? If you did not start reading it last week, commence now. We have a few copies of last week's issue if you want to get the first installment.

Mr. H. J. Desmond left last Sunday on a business trip to Hanna and Calgary. During his absence the Beaver Lumber is in charge of Mr. W. J. Robinson of Hanna.

Excel Items

Mrs. T. Littleford left last Monday for Edmonton, where she will attend the funeral of her brother, Mr. J. Anderson, whose death occurred last Sunday.

Mrs. MacMillan and children spent the week-end with Mrs. Pilly in Cereal.

Louis Gullekson is expected home on a visit this week from Wetaskawin.

Light snowfall commenced at night which has since become quite a heavy fall, with indications that it may last for several hours.

Chautauqua Programs Please Patrons

Oyen's fall chautauqua, which opened last Saturday evening with a capacity house, has been well patronized and patrons are well pleased with the entertainment provided.

On the opening night the Martin Erwin Players were enthusiastically received in their presentation of "Turn To The Right", a stage play.

On Monday afternoon and evening delightful programs were given by the Lowell Patton Artists. Mr. Patton, pianist and composer, Mr. Fenwick Newell, tenor, and Miss Gloria Robinson, soprano, proved a very popular trio, and each number given won hearty rounds of applause.

The Temburiza Serenaders who provided the program on Tuesday afternoon and the first half of Tuesday evening, gave a well varied entertainment. Private Pate, concluded the evening program with his lecture, "The Inexcusable Lie." Delivered in pleasing style, it proved a very popular contribution to the chautauqua program.

This evening the Martin Erwin Players conclude the fall chautauqua with the stage three act comedy "The Patsy".

Mr. Gordon Caswell and Mr. Frank Reid motored to Loyalist last Sunday, and returned with Mr. Caswell's car.

Mr. Earl Keown of Calgary, who arrived in Oyen last Monday, is visiting his parents Mr. and Mrs. E. J. Keown.

Eleventh Fortnightly Crop Report

Issued by the Department of Agriculture Edmonton, October 8, 1930.

Threshing has been seriously delayed by unfavorable weather during the past fortnight. Snow and rain, followed by dull foggy days, made threshing impossible, and resulted in a slight lowering of grade in some districts.

At present a series of warm bright days has put all grains in excellent threshing condition and this work is proceeding rapidly.

In south eastern Alberta threshing is almost completed. In the south west and central parts of the Province, from 50 to 75 per cent of wheat is threshed, while in the northern area, and Peace River district, wheat threshing is from 35 to 50 per cent completed. Threshing percentages for oats and barley are about 10 per cent lower than those for wheat, throughout the Province.

Yields have been equal to expectations and provide assurance that the estimate of 120,000,000 bushels of wheat issued by the Dominion Bureau of Statistics, will be realized. The yield of coarse grains in the east central part of the Province is very low. In the south west, fair and in the northern and Peace River district, very heavy. Many yields of 100 bushels per acre of oats are recorded. Potato and root crops will give excellent returns and the supply will be at least equal to domestic requirements with possibility of some surplus.

Sugar Beet harvesting operations were delayed by unfavorable weather, but are now progressing favorably with yield and quality above average. There is also 50 per cent increase in acreage over the previous year.

SAVE...

Guard Your Money

Dairy, poultry and garden money soon disappears when used to meet petty expenses. Save this money systematically. Place it regularly in a Savings Account. Its quick growth will surprise you and give you a good sum to rely on when the need arises.

Use Bank Money Orders when sending remittances through the mail. They cost very little and insure safety from loss.
